LOANSERVE

DAY	WHAT YOU BUILD	MODULES TO EDIT
WEEK 1 · PYTHON CORE - the lending rules become a package		
W1 D1	Eligibility from standard input	**`scripts/day01_loan_eligibility.py`**
W1 D2	The same rules as functions and a class	**`scripts/day02_loan_pricing.py`**
W1 D3	A package, an error hierarchy and the first file on disk	**`loanserve/__init__.py`** **`loanserve/data_access/__init__.py`** **`loanserve/data_access/file_storage.py`** **`loanserve/core/__init__.py`** **`loanserve/core/exceptions.py`** **`loanserve/core/loan_calculations.py`**
W1 D4	An entity hierarchy and a factory	**`loanserve/core/entities.py`**

W1 D5	Validators, decorators and objects out of storage	**`loanserve/core/decorators.py`**
		`loanserve/core/validators.py`
		`loanserve/data_access/file_storage.py`
		`loanserve/core/loan_calculations.py`

WEEK 2 · DATA, SQL AND THE FIRST ENDPOINTS		
W2 D1	Cleaning the application book, and a vectorised schedule	**`loanserve/data_access/cleaning_pipeline.py`** `loanserve/core/loan_calculations.py`
W2 D2	SQLite and three SQL reports	**`loanserve/data_access/database_loader.py`** **`loanserve/data_access/database_reports.py`**
W2 D3	Request models and the application factory	**`loanserve/api/__init__.py`** **`loanserve/api/application_factory.py`** **`loanserve/api/schemas.py`** **`loanserve/api/routers/__init__.py`**

W2 D4	A store, a reply model and the first two endpoints	**`loanserve/api/repository.py`**
		`loanserve/api/routers/loan_applications.py`
		`loanserve/api/application_factory.py`
		`loanserve/api/schemas.py`

W2 D5	ORM tables and the last two endpoints	**`loanserve/api/orm_models.py`** `loanserve/api/routers/loan_applications.py`
WEEK 3 · THE SERVICE HARDENED, AND THE FIRST MODEL		
W3 D1	An interface, a SQL store, and a factory that chooses	`loanserve/api/application_factory.py` `loanserve/api/repository.py`

DAY	WHAT YOU BUILD	MODULES TO EDIT
W3 D2	Rate limiting, request logging and password storage	**loanserve/api/middleware.py** **loanserve/api/password_hashing.py** loanserve/api/application_factory.py
W3 D3	Tokens, roles, the audit trail and the schedule endpoint	**loanserve/api/access_control.py** loanserve/api/routers/loan_applications.py
W3 D4	Accounts, login, the guard and paged listing	**loanserve/api/routers/user_accounts.py** loanserve/api/application_factory.py loanserve/api/schemas.py loanserve/api/routers/loan_applications.py
W3 D5	The shared preparation and the baseline model	**loanserve/risk_models/__init__.py** **loanserve/risk_models/baseline_model.py** **loanserve/risk_models/feature_pipeline.py**
WEEK 4 · RISK MODELS, COMPARISON AND THE WORK QUEUE		
W4 D1	Two tree models, and one measurement that disagrees	**loanserve/risk_models/tree_models.py** loanserve/risk_models/baseline_model.py loanserve/risk_models/feature_pipeline.py
W4 D2	A fourth model and a fairer comparison	**loanserve/risk_models/cross_validation.py** loanserve/risk_models/baseline_model.py
W4 D3	Three derived columns, and whether they earn their place	**loanserve/risk_models/feature_engineering.py** loanserve/risk_models/feature_pipeline.py loanserve/risk_models/tree_models.py
W4 D4	The champion, and a threshold chosen on money	**loanserve/risk_models/champion_model.py**
W4 D5	The work queue	**loanserve/risk_models/work_queue.py**
WEEK 5 · MESSAGES - cleaning, classifying, attention, and the first model call		
W5 D1	Cleaning the message corpus	**loanserve/message_intelligence/__init__.py** **loanserve/message_intelligence/text_cleaning.py**
W5 D2	Two classifiers, with the cleaning inside	**loanserve/message_intelligence/message_classifier.py**
W5 D3	Attention, written out in NumPy	**loanserve/message_intelligence/attention.py**
W5 D4	Extractive summary by attention	**loanserve/message_intelligence/thread_summary.py**
W5 D5	The first language model call	**loanserve/message_intelligence/llm_client.py**
WEEK 6 · ENTITIES, BATCHING, SAFETY, ESCALATION - and the policy book		
W6 D1	Entities, and references checked against the book	**loanserve/message_intelligence/entity_extraction.py**

DAY	WHAT YOU BUILD	MODULES TO EDIT
W6 D2	A batch, and one bad message not taking the rest with it	**loanserve/message_intelligence/batch_pipeline.py**
W6 D3	The injection guard	**loanserve/message_intelligence/injection_guard.py** loanserve/message_intelligence/batch_pipeline.py
W6 D4	Escalation on three independent readings	**loanserve/message_intelligence/escalation.py**
W6 D5	Loading and chunking the policy book	**loanserve/retrieval/__init__.py** **loanserve/retrieval/chunking.py** **loanserve/retrieval/document_loader.py**
WEEK 7 · RETRIEVAL, GROUNDED ANSWERS, AND THE ASSISTANT BEGINS		
W7 D1	Embeddings and a store pinned to cosine	**loanserve/retrieval/vector_store.py**
W7 D2	Grounded answering with checked citations	**loanserve/retrieval/grounded_answer.py**
W7 D3	Narrowing the search by product	**loanserve/retrieval/filtered_search.py** loanserve/retrieval/vector_store.py
W7 D4	Four tools over days already built	**loanserve/assistant/__init__.py** **loanserve/assistant/tools.py**
W7 D5	The state that travels, and triage as the first node	**loanserve/assistant/nodes.py** **loanserve/assistant/state.py**
WEEK 8 · THE AGENTS, THE GRAPH, AND THE WHOLE THING RUNNING		
W8 D1	The planner, the resolver, and the node that runs their plan	**loanserve/assistant/agents.py** loanserve/message_intelligence/llm_client.py loanserve/assistant/nodes.py
W8 D2	The last two agents, the approval gate, and the graph assembled	**loanserve/assistant/graph.py** loanserve/assistant/agents.py loanserve/assistant/nodes.py
W8 D3	The checkpointer, the endpoint, and the whole thing running	**loanserve/api/routers/assistant.py** **loanserve/assistant/workflow.py** loanserve/api/application_factory.py loanserve/api/schemas.py loanserve/api/routers/__init__.py
